EXPERIENCE

Backend Developer

Dec 2025 – Present

Almatar

- Architect and develop scalable NestJS microservices and secure REST APIs, design queue- and topic-based event-driven workflows, and contribute to system architecture decisions.
- Monitor Argo CD deployments, manage infrastructure and Vault secrets, and diagnose production issues with Grafana, OpenSearch, and Sentry to improve system reliability.
- Redesigned and refactored the Gift Module into a product-agnostic service, decoupling it from Flights and Hotels to improve reusability and enable external partner offerings, including Nusuk.
- Integrated Zetexa's eSIM APIs to deliver destination-based plans with dynamic options and pricing, expanding the platform's travel-service capabilities.
- Integrated ANB Bank card eligibility into the purchase flow, automatically rewarding qualifying transactions with wallet points for a promotional campaign.
- Designed and implemented Book Now, Pay Later for gift purchases, with configurable payment grace periods and automatic cancellation of unpaid reservations.

Software Engineer

Oct 2024 – Sep 2025

RmzTech

- Built and deployed RESTful APIs integrated with web and mobile applications.
- Standardized local development and streamlined production deployments by containerizing backend services with Docker.
- Improved system stability and throughput by optimizing database queries and refactoring legacy code.

EDUCATION

Ain Shams University

Sep 2020 – Jul 2024

Bachelor of Computer Science

- Ranked 1st among 1,500 peers in the 2022 Data Structures contest, with a solution 34x faster than the average.
- Placed 2nd among 1,200 teams from 420 colleges in Egypt's 2023 Smart Cities Hackathon.
- Multi-GPT LLM – Multimodal graduation project (Grade: A).

Mobile Development Nanodegree Program

2023

Ministry of Telecommunication, Egypt FWD, and Udacity Scholarship

PROJECTS

7R Logistics – Freight Management Platform

Feb 2024 – May 2025

- Delivered a digital freight platform for 7R Logistics managing 100+ trucks and 200+ drivers.
- Automated operations and reduced manual coordination by implementing eight-role access control and 12+ workflows with Laravel and FilamentPHP.

Jaw Academy – E-Learning Platform

Feb 2023 – Jun 2024

- Scaled Jaw Academy from launch to 300K+ users by building robust backend and cross-platform solutions.
- Maintained sub-50 ms latency for real-time grading and live learning sessions through high-performance backend infrastructure.
- Accelerated feature delivery 3x by streamlining CI/CD pipelines and mentoring engineering squads.

Other Projects

- BinRushd (Hospital), E-commerce (Spring Boot), MAKchain Smart Identity Blockchain Framework for Governments, FOSS OS from Scratch, Tiny Programming Language Compiler, Chatty, Blackjack Game (Java), M-Movies.

TECHNICAL SKILLS

Core Competencies: OOP, Data Structures, Algorithms, SOLID Principles, Design Patterns, Concurrency

Programming Languages: TypeScript/JavaScript, Java, PHP, C++, Python

Technologies: RESTful & SOAP APIs, NestJS, Spring Boot, Laravel, Apache Kafka, RabbitMQ, Redis, MySQL, PostgreSQL, MongoDB, Git, Docker, GitHub Actions, GitLab, Argo CD, Vault, Grafana, Prometheus, OpenSearch, Sentry, Linux, HTML/CSS

Problem Solving: Solved 350+ algorithmic problems on Codeforces and 60+ problems on LeetCode
